Mouse Anti-Human IFN-γ Monoclonal Antibody Datasheet

Product Name: mAb anti-Human IFN-γ Catalogue No.: MO-C40004E		Clone No.: 165 Quantity: 0.5 mg/vial	
Durification	Interferon-gamma (IFN-γ)		up-regulates other genes to stimulate and modulate immunity mainly through
Purification:	Protein G affinity purified		the Jak-Stat signalling pathway. It promoters T helper 1 differentiation and
Target Protein:	Human IFN- γ		cell associated immunity, and also suppresses T helper 2 differentiation
Immunogen:	Purified recombinant human IFN- γ		and humoral immunity.
Fusion Myeloma:	Sp2/0-Ag14		IFN-γ is a potent macrophage activator.
-	This optihody recognizes both		It binds to macrophage in conjugation
Specificity:	This antibody recognizes both recombinant and native human IFN-γ.		with CD40, causing the macrophage to produce elevated amounts of MHC
			molecules. It also stimulates the
Species Reactivity:	Human, other species not tested		production of antigen-processing associated transporters and enzymes.
Host / Isotype:	Mouse, IgG1 Kappa		IFN-γ is critical for anti-tumour and anti-
Formulation:	Lyophilized from a solution in 0.01M		viral immunity.
	PBS, pH 7.0	Applications:	ELISA: In indirect ELISA, the antibody reacts with recombinant IFN-γ coated
Reconstitution:	Double distilled water is recommended		plate at 0.1ng/mL of antibody
	to adjust the final concentration to 1.00mg/mL.		concentration.
Storage:	Store at -20°C		Western Blot: This antibody, used at a
Storage.			concentration of 0.5μg/mL, will allow visualization of 100ng/lane of IFN-γ.
Research	Pro-inflammatory cytokine, anti-tumour		visualization of 100ng/lane of IFN-y.
Area:	and anti-viral immunity	References:	If research is published using this
Background:	IFN-γ is produced predominantly by		product, please inform Anogen in order
	natural killer and natural killer T cells as		to cite the reference on this datasheet.
	part of the innate immune response,		Anogen will provide one unit of product
	and by CD4 and CD8 cytotoxic T		in the same category as gratitude.
	lymphocyte (CTL), effector T cells once		
	antigen-specific immunity develops.		
This product i	s for LABORATORY RESEARCH USE and further animals for use in diagnosti
