Mouse Anti-Human IL-1 β Monoclonal Antibody Datasheet

Product Name: mAb anti-Human IL-1 β

Clone No.: S1B7

Catalogue No.: MO-C40029B

Quantity: 0.5 mg/vial

Description: Mouse monoclonal antibody to human Interleukin-1 beta (IL-1 β)

Purification: Protein G affinity purified

Product Type: Primary antibody

Target Protein: Human IL-1 β

Immunogen: Purified recombinant human IL-1 β

Fusion Myeloma: Sp2/0-Ag14

Specificity: Reactive with natural and recombinant human IL-1 β

Species Reactivity: Human, others not tested

Cross-Reactivity: Does not show any cross reaction with recombinant human IL-1 α , recombinant murine IL-1 α or IL-1 β .

Host / Isotype: Mouse, IgG1 Kappa

Formulation: Lyophilized from a solution in 0.01M PBS, pH 7.2.

Reconstitution: Double distilled water is recommended to adjust the final concentration to 1.00mg/mL.

Storage: Store at -20 $^{\circ}$ C

Research Area: Cytokine, inflammation

Background: Interleukin 1 β (IL-1 β) shares the IL-1 receptor with other cytokines in IL-1 family. It is primarily produced by activated macrophage as a proprotein, which is cleaved by caspase I to become active. Like IL-1 α , IL-1 β is an important mediator of innate immunity. IL-1 β stimulates lymphocyte proliferation and the production of TNF- α , IL-6 and IL-8. IL-1 β and TNF- α can synergically act at NF κ B and mitogen kinases including JNKs and p38 MARKs, thus leading to the selective expression of genes for immunity and inflammation.

Applications: **ELISA:** React with human IL-1 β
Western Blot: React with human IL-1 β .
