Mouse Anti-HCV NS-3 Monoclonal Antibody Datasheet

Product Name: mAb anti-HCV NS-3	Clone No.: 1-5
Catalogue No.: MO-I40018B	Quantity: 0.5 mg/vial
Description: Mouse monoclonal antibody to human hepatitis C virus (HCV) non-structural protein NS-3	Research Area: Virology
Purification: Protein G affinity purified	Background: Hepatitis C virus (HCV) causes chronic hepatitis and liver cirrhosis in human through blood and body fluid transmission. HCV has a positive sense single RNA genome enclosed in the nucleocapsid made of core protein (capsid protein). The nucleocapsid is covered by an envelope made of lipoproteins (E1 and E2). The 9.6 kb HCV genome has a single open-reading frame, which is to be translated into a single polyprotein. HCV viral proteins are produced after processing the polyprotein. Genes for core protein and envelop proteins are located adjacently at the 5'-end of HCV genome, followed by genes for non-structural proteins including NS2, NS3, NS4A, NS4B, NS5, NS5A and NS5B.
Product Type: Primary antibody	
Target Protein: Human hepatitis C virus (HCV) non-structural protein NS-3	
Immunogen: A highly antigenic polypeptide consisting of essential sequences of at least 60 residues in length, which were selected from genes encoding the NS-3 region of a Chinese HCV strains.	
Fusion Myeloma: Sp2/0-Ag14	
Specificity: React with synthetic HCV NS-3 protein (residues 1378-1458 on HCV polyprotein)	
Species Reactivity: Human hepatitis C virus, others not tested	Applications: ELISA: React with HCV HS-3
Cross - Reactivity: No cross-reaction was found with HCV polyprotein core region and other non-structural regions.	Western Blot: mAb clone 1-5, at a concentration of 4µg/mL will allow visualization of 200ng/lane synthetic NS-3 protein. The mAb works on blots transferred from both reducing and non-reducing PAGE gel.
Host / Isotype: Mouse, IgG1 Kappa	
Formulation: Lyophilized from a solution in 0.01M PBS, pH 7.2	References: If research is published using this product, please inform Anogen in order to cite the reference on this datasheet. Anogen will provide one unit of product in the same category as gratitude.
Reconstitution: Double distilled water is recommended to adjust the final concentration to 1.00mg/mL.	
Storage: Store at -20°C	

This product is for LABORATORY RESEARCH USE and further manufacture ONLY, and cannot be administrated to human and animals for use in diagnostic and therapeutic procedures.
