Mouse Anti-HCV NS-3 Monoclonal Antibody Datasheet

Product Name: mAb anti-HCV NS-3	Clone No.: 806
Catalogue No.: MO-I40018K	Quantity: 0.5 mg/vial
Description: Mouse monoclonal antibody (mAb) to human hepatitis C virus (HCV) non-structural protein NS-3	Research Area: Virology
Purification: Protein G affinity purified	Background: Hepatitis C virus (HCV) causes chronic hepatitis and liver cirrhosis in human through blood and body fluid transmission. HCV has a positive sense single RNA genome enclosed in the nucleocapsid made of core protein (capsid protein). The nucleocapsid is covered by an envelope made of lipoproteins (E1 and E2). The 9.6 kb HCV genome has a single open-reading frame, which is to be translated into a single polyprotein. HCV viral proteins are produced after processing the polyprotein. Genes for core protein and envelop proteins are located adjacently at the 5'-end of HCV genome, followed by genes for non-structural proteins including NS2, NS3, NS4A, NS4B, NS5, NS5A and NS5B.
Product Type: Primary antibody	Applications: ELISA: React with HCV NS-3 Western Blot: mAb clone 806, when used at concentration of 0.1-1µg/mL will allow visualization of 100ng/lane of both recombinant chimeric HCV polyprotein and recombinant NS-3 protein. No reaction can be seen with synthetic NS-3. Testing was conducted on blot transferred from both reducing and non-reducing PAGE gel.
Target Protein: Human hepatitis C virus (HCV) non-structural protein NS-3	References: If research is published using this product, please inform Anogen in order to cite the reference on this datasheet. Anogen will provide one unit of product in the same category as gratitude.
Immunogen: Purified recombinant chimeric HCV polyprotein (555 amino acid residues)	
Fusion Myeloma: Sp2/0-Ag14	
Specificity: mAb 281 reacts with recombinant NS-3 (residues 1252-1477 on HCV polyprotein), synthetic NS-3 (residues 1378-1458 on HCV polyprotein), and recombinant chimeric HCV polyprotein.	
Species Reactivity: Human hepatitis C virus, others not tested	
Cross - Reactivity: No cross reaction can be seen with recombinant core protein C and envelop protein M (residues 1-142), synthetic core protein C (residues 1-61), and synthetic NS-4a protein (residues 1689-1735)	
Host / Isotype: Mouse, IgG2a Kappa	
Formulation: Lyophilized from a solution in 0.01M PBS, pH 7.0	
Reconstitution: Double distilled water is recommended to adjust the final concentration to 1.00mg/mL.	
Storage: Store at -20oC	

This product is for **LABORATORY RESEARCH USE** and further manufacture **ONLY**, and cannot be administrated to human and animals for use in diagnostic and therapeutic procedures.
