Mouse Anti-Human GP IIb/IIIa Monoclonal Antibody Datasheet

Product Name: mAb anti-Human GP IIb/IIIa Clone No.: 128

Catalogue No.: MO-M40040S Quantity: 0.5 mg/vial

Description: Mouse monoclonal antibody to human

platelet membrane glycoprotein IIb/IIIa

(GP IIb/IIIa)

Purification: Protein G affinity purified

Product Type: Primary antibody

Target Protein: Human platelet membrane glycoprotein

IIb/IIIa

Immunogen: Human platelet suspension.

Fusion Sp2/0-Ag14

Myeloma:

Specificity: The mAb reacts with human platelet.

Species Human, others not tested

Reactivity:

Host / Isotype: Mouse, IgG1, Kappa

Formulation: Lyophilized from a solution in 0.01M

PBS, pH 7.2

Reconstitution: Double distilled water is recommended

to adjust the final concentration to

1.00mg/mL.

Storage: Store at -20°C

Page 1 of 1 page(s)

Research Hematology, blood coagulation

Area:

Background: Human platelet membrane glycoprotein

Glycoprotein IIb/IIIa (GP IIb/IIIa) is a dominate receptor on the platelet membrane with very high molecular weight (>200kDa). After the platelet is activated, the GP IIb/IIIa receptor complex changes conformation and binds to fibrinogen in blood circulation with high affinity. The activation of platelets is initiated locally when the endothelial layer is wounded and the platelets are exposed to the collagen underneath the endothelium. The fibrinogen aggregates with platelets when binding to the GP IIb/IIIa receptor on platelets, thus primary haemostasis

(Platelet clot) is formed.

Applications: ELISA: The mAb is reactive to platelet

coated ELISA plate.

Other applications have not been

evaluated.
